

## 4-channel optical module

This product provides four channels of optical isolation with both a non-inverting output and an inverting output for each channel. Both the input side and the output side are designed to interface with ...

Whether you're looking to control a 220V AC load with a 5V logic signal or protect a microcontroller from voltage surges, the 4-Channel 817 Optocoupler Module provides a robust, ...

Jumper Cap Can Achieve Output Port Is High Potential Or Pull Down Output. 4. Onboard 4-Channel 817 Are Independent:can achieve different voltage control at then same time. The output ...

The OPTO-4 presents two voltage/current selection banks for each channel, one for the input side, and one for the output side. These accommodate a variety of common voltages: 3.3V, 5V, 9V, 12V, and ...

This 4-channel optocoupler isolation board is designed to safely connect low-voltage digital systems (such as 3.3V/5V microcontrollers or Arduino) to high-voltage or noisy equipment.

The Cisco ONS 15216 4 Channel OADMs are well suited to applications with ...

The Cisco ONS 15216 4 Channel OADMs are well suited to applications with minimal wavelength requirements and tight space and power constraints, such as cell site and customer premises ...

Explore our full range of 100G single lambda and 4 channel optical transceivers, including duplex single fiber bidirectional options and DWDM-ready ...

The 4-channel optocoupler isolation module features four independent ports for control signal isolation. Allows for interfacing devices to a microcontroller or other device with full isolation between the input ...

This compact module utilizes four independent TLP281 optocoupler chips, providing four channels of reliable electrical isolation between two separate parts of a circuit.

The QSFP28 LR4 is a hot-pluggable, four-channel, and full-duplex optical transceiver module designed for long-distance transmission up to 10 km in the 100G Ethernet network with a ...

In this paper, a four-channel optical emission module is designed and fabricated for optical phased array applications. Using hybrid integration technology, the module integrates DML ...
