

4U Switch Energy Saving Type

This 6kVA on-line 4U rackmount UPS provides pure sine wave power and extended runtime to support critical electronics during power disruptions. It comes with Hard Wire 3-wire (2P+E) input, 2x NEMA ...

Input cord and outlets are mounted on a detachable backplate with manual bypass switch to enable hot-swappable UPS replacement without powering off connected equipment

The 2880VA line interactive 4U rack/tower UPS provides pure sine wave power to support critical electronics during power disruptions. The SMX comes with NEMA L5-30P input, 6x NEMA 5-15R, 3x ...

Provides perfectly regulated, sine wave output power free of line noise, transient surges and frequency variation for the most efficient operation of critical servers, networking and telecommunications ...

The SU6000RT4UHVHW features a highly efficient (96%) economy mode setting that can significantly reduce a facility's energy costs by minimizing heat output, reducing cooling requirements ...

As a Spine-layer switch, it utilizes its 128 x 400GbE ports to downlink to up to 128 Leaf-layer switches, ensuring ultra-high bandwidth and low-latency connectivity across the data center.

The SU6000RT4UHV features a highly efficient (96%) economy mode setting that can significantly reduce a facility's energy costs by minimizing heat output, reducing cooling requirements and ...

From conception to end-use, G4 PDU has been designed to reduce energy consumption whilst optimising and monitoring power usage accurately. Plan better for extended power failure events and ...

Dual-conversion UPS converts raw input from AC to DC, then back to perfect sine wave AC output with enhanced protection from harmonic distortion, fast electrical impulses and other hard-to-solve power ...

setting that can significantly reduce a facility's energy costs by minimizing heat output, An LCD display with LED indicators enables IT personnel to operating modes and conditions. The LCD/LED panel ...
