

Are China Unicom's optical splitters intelligent

China Unicom actively deployed in frontier technology areas such as next-generation Internet and next-generation optical networks, accelerating the cultivation of new driving forces and new advantages.

Intelligent FTTR: Stable and reliable connection (2/2) Use case: upgraded FTTR for better WiFi experience, providing users with 2000M service

During MWC 2024, Huawei and China Unicom released their latest cooperation results, including 5G-A, Whole-House Optical Broadband 3.0, and AI big model.

Best-in-class managed photonics, multilayer switching and intelligence in a proven purpose-built platform enables China Unicom to realize the full potential of their optical network in the cloud ...

In this test, the SD-OTN collaborator developed by China Unicom was used to connect with the intelligent management and control systems of different vendors, one of which is ZENIC ...

China United Network Communications Group Co., Ltd., doing business as China Unicom, is a Chinese state-owned telecommunications operator.

To meet the new requirements of home, enterprise, and computing scenarios, China Unicom will integrate its architecture for all-optical base target networks end-to-end and build up its differentiated ...

Unicom launched CUBE-Net 3.0, with "all-optical network" at the core. In March 2021, China Unicom released a white paper to upgrade the CUBE-Net network innovation system from 2.0 ...

The all-optical infrastructure realizes "connected homes, connected enterprises, and joint computing", and has achieved significant social benefits in promoting the development of digital ...

At the 2024 European Green All-Optical Network summit, China Unicom won the Premium User Experience With Optical Broadband Award. In terms of products, China Unicom provides all ...
