

Are there any 16mm beam splitters

Thorlabs offers a wide range of optical beamsplitters. Our plate beamsplitters have a coated front surface that determines the beam splitting ratio while the back surface is wedged and AR coated in ...

This beam splitters buying guide provides technical background, comparison of major types, selection criteria, and an overview of suppliers.

Our beam splitters are made from high grade glass material with laser grade surface flatness & surface quality for tighter tolerance on the splitting ratio.

These beam splitters are designed to reflect the laser's signal at single-digit percentages and can be used in series to greatly reduce the laser light before being imaged.

When working with lasers, it is often necessary to split a laser beam into two or more defined partial beams. There are a variety of beam splitters for these applications, with different advantages and ...

Beam Splitters Features: o Rugged compact design o Broad wavelength range o Low insertion loss o High extinction ratio o Low return losses o Low Polarization Dependent Loss (PDL) o Low Wavelength ...

There are two main types of beamsplitters, plate beamsplitter and cube beamsplitter and each has their own advantages. Some industries that use beamsplitters are interferometry, bio-medical, metrology, ...

Does anyone in the group know where I can source a replacement beam splitter for an Aaton LTR 54? My camera had one that worked perfectly, but it seems to have shattered (the glass ...

Light can be split by percentage of overall intensity, wavelength, or polarization state. Edmund Optics offers plate, cube, pellicle, polka dot, or specialty prism Beamsplitters in a variety of anti-reflection ...

10BC16PC.11 - Beam Splitter from MKS | Newport. Get product specifications, Download the Datasheet, Request a Quote and get pricing for 10BC16PC.11 on GoPhotonics.
