

Automatic Optical Cable Sorting

Automate your production line with our fiber optic cable sorting and coiling machine. This system ensures efficient, tangle-free coiling for improved packagi...

We provide training and instruction on how to handle each different material you will be recycling and help with adjustments on how to sort them based on your requirements.

RKE offers vision inspection system and optical sorting machine for inspection and sorting fasteners, precision components, automotive parts and more.

Automated optical inspection means efficient 100% testing and sorting of series parts, small parts and bulk goods by automated testing systems - either in the production line, or as standalone solutions, ...

Cable Management's optical sorters integrate seamlessly into your processing line. We provide training and instruction on how to handle each different material you will be recycling and help with ...

A Cable Accessories Inspection Sorting System is a sophisticated piece of equipment designed to ensure the highest quality standards in Cable Accessories production. This advanced ...

Discover advanced cable sorting machines that automate cable separation by material, size, or color using AI, spectroscopy, and XRF technology. Ideal for recycling and manufacturing, these machines ...

Optical sorters are designed as quality-control stations for high-value products. They provide recyclers, manufacturers, and processors with an automated, scalable solution for ...

Our optical sorting machines automatically root out your rogue products, which in turn makes your manufacturing more efficient and less wasteful. Never deliver a bad product again. Inspect, sort, ...

The Eldan Sorting SPS is designed to optimize cable granulate separation, ensuring maximum recovery and purity. Using RGB cameras combined with AI algorithms, and inductive sensors.
