

Bahamas DFB Distributed Feedback Laser Anti-tracking Warranty

The acronym DFB laser stands for distributed feedback laser. Their key features relative to other semiconductor lasers are their single longitudinal mode (single frequency) emission profile, ...

A distributed-feedback laser (DFB) is a type of laser diode, quantum-cascade laser or optical-fiber laser where the active region of the device contains a periodically structured element or diffraction grating.

Thorlabs" Distributed Feedback (DFB) Lasers are narrow-linewidth, single-frequency laser diodes that use a corrugated waveguide throughout the active region of the laser cavity (see SFL Guide tab).

nanoplus uses a unique and patented technology for DFB laser manufacturing. We apply a lateral metal grating along the ridge waveguide, which is independent of the material system and provides single ...

With versatile, hermetically sealed packages like HHL, TO-can, and fiber-coupled options, our customizable DFB laser diodes ensure precise spectral control and reliable integration into advanced ...

This page describes our DFB-LD (Distributed Feedback Laser Diode) products suitable for applications such as fiber sensing, 3D sensing, and gas sensing.

These products utilize patented Etched Facet Technology (EFT) for wafer-scale testing and manufacturing with the following benefits: Products are RoHS compliant, designed for Telcordia GR ...

The front facet of the laser chip is provided with a high quality antireflection coating for avoiding the Fabry Perot modes of the laser chip. Distributed Feedback (DFB) Diode Lasers are available at ...
