

Cable tray angle steel processing

Start designing with cable trays by Chalfant Manufacturing today! Find out more about our products and systems for a wide range of applications.

Straight sections of solid bottom cable trays constructed from single sheet of metal, providing excellent protection from external damage. They are used primarily for intrumantal control, ...

The flexible coupler provides easy installation without measuring and cutting cable tray side rails. Once installed, the coupler allows for electrical continuity, therefore eliminating the requirement for a ...

Cable trays produced using robotic welding systems provide maximum structural durability. This allows them to be safely used in challenging work environments with high load-carrying capacity.

Perforated angle & channel is designed to be a tubing and cable support system which utilizes bolt together fittings to route tubing or cable runs in an industrial application.

TechLine Mfg perforated angle & channel cable trays from hot dipped galvanized, aluminum, & 304 SS finishes available. Contact us for a quote!

Our galvanized channel angles are fabricated using high-quality steel, ensuring they possess the strength necessary to support heavy loads and withstand mechanical stress. Galvanized channel ...

These are the most corrosion-resistant tray systems we offer for routing cable and hose in configurations such as curves, slopes, and tees. Cut, bend, and connect the wire mesh trays.

The Ladder Tray features light, rugged, tubular steel construction. It is designed for mechanical support and strain relief in long runs of cable and creates a smooth gradual bend for cable.

Usage: is used in regulating the conduct of cables, repair and detection of breakdowns inexpensive, Add and modify cables easily, Protect cables from external factors, heat and moisture. Material: ...
