

Canadian telecommunications data center construction companies

At TCA Developments, we specialize in the construction of data centres and colocation facilities across Canada, with a strong presence in Toronto, Edmonton, Vancouver, and throughout Western Canada.

Widely regarded as the largest Canadian-owned and operated data centre provider, eStructure holds the top spot for its unwavering commitment to the domestic market.

Notable data centre builds include the Rogers Data Centre in Edmonton, Shaw Campus Data Centre in Airdrie, and a confidential 300,000 sq. ft. facility in Calgary, built to LEED standards.

As data processing moves closer to the source, we construct distributed edge data centers that are compact, secure, and highly connected, supporting low-latency applications.

The company combines commercial construction execution with data centre-specific project planning for customers building or upgrading colocation, enterprise, telecom-ready, and hyperscale ...
