

Capacity of Intelligent Integrated Distribution Box

The JP Series Outdoor Integrated Distribution Box combines multiple functions--such as metering, outgoing circuits, and reactive power compensation--into a single, compact outdoor-ready ...

The internal power distribution is carried out either via cables, busbars or PCB technology and connects fuses, diodes and relays. The cable set can be connected to the box via plug-in or screw ...

It is an ideal low-voltage complete set of equipment in the current power grid transformation.

Smart integrated distribution boxes offer functionalities such as remote monitoring, fault detection, and energy management, contributing to more sustainable practices.

Taikai Group can supply all major power transmission and transformation equipment of 550 kv and below in complete sets and has the general contracting capacity for EPC substation ...

It is installed in the low-voltage end of transformer with outdoor capacity of 500KVA and below, or urban power grid, rural power grid, industrial and mining enterprises, street lighting, residence community ...

In three-phase AC 660V (50/60Hz) below the rod transformer distribution cabinet with transformer capacity: 80KVA, 100KVA, 125KVA, 160KVA, 200KVA, 250KVA

Integrated distribution box (JP cabinet) JP integrated distribution box: The box is divided into 4 chambers, which are incoming, outgoing, metering and capacitor rooms.

It is applicable for the power distribution system with AC 50Hz and rated voltage of 400V in urban network, agricultural network modification, industrial and mining enterprises, street lighting, ...

The precision power distribution cabinet is an intelligent power distribution cabinet that comprehensively collects all energy data for the energy terminal of the data center room, and provides high-precision ...

Taikai Group can supply all major power transmission and ...
