

Fibertronics, Inc. provides an extensive selection of fiber optic attenuators tailored to meet diverse needs. These attenuators are suitable for use in single mode 9/125, multimode 50/125, and ...

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

Useful in all networks including WDM and EDFA system applications with high-power laser sources, these single-mode and multimode fiber attenuators are manufactured using doped fiber, provide ...

Fiber optic attenuators are devices used to reduce or monitor the power level of a fiber optic signal. Basic types of fixed attenuation include single mode, dual window and multimode in D4/PC, FC, ...

Our multimode fiber optic filter/attenuator mount is capable of holding a variety of filters and an shutter-based attenuator; it is also designed for SMA patch cables.

Variable attenuators based on the neutral density filter are ideal for multi mode fiber applications where one may be concerned about modal noise. When blocking style attenuators are used with multi ...

Boston Applied Technologies" Eclipse™ Multimode Variable Optical Attenuators (MM-VOAs) maintain a constant output optical power in the multimode fiber transmission line, regardless of the wavelength ...

This type of fiber optic attenuator is ideal for multimode fiber applications because the neutral density filter attenuates all modes equally, and results in stable attenuation and linear response.

Thorlabs has a wide variety of single mode (SM), polarization-maintaining (PM), or multimode (MM) fixed and variable optical attenuators (VOAs). We offer SM and PM electronic VOAs that provide control of ...

The N7768C is a four-channel power-monitored optical attenuator for multimode fiber applications. Its bulk-optic filter and collimated beam path is designed to assure homogeneous attenuation of all input ...
