

Custom Process for 850nm Anti-Critical Fiber Optic Cable for Airports

To ensure our light guides and fiber optic products meet the highest standards, we rely on a specialized manufacturing process. This allows us to guarantee exceptional chemical and tactile robustness so ...

Use our interactive configurator to choose fiber type, length, jacket, and connector style. Upload your drawings, data sheets, or project documentation--we'll respond with a quote. We've delivered ...

Aimifiber offers custom designed and purpose-built fiber optic cables. Our engineers will work closely with you in every stage of the design process to ensure optimal solution of your unique application ...

Looking for a fiber optic solution? Whether OEM assemblies, high-power fiber cables, or fiber bundles for extreme environments, our team will support you from concept to delivery.

The better, faster, easier way to build fiber optic cables is here. Use our online cable configurator for custom fiber, copper, and RF cables, delivered quickly.

Customize the configuration of your fiber optic cable to perfectly align with the requirements of your application. Thoughtfully consider the cable's construction and take into account the presence of ...

Nextrom offers unrivaled purity during the PCVD deposition process by providing a leak-free process for specialty preform production with an optimal final result. Custom-designed rotary seals and reliable ...

If our selection of stocked patch cables does not meet your needs, we also offer custom patch cable services. Please use the form below to build and order your custom cable.

We manufacture custom fiber optic assemblies for a range of applications. You can tell us exactly what your project requires, or you can browse some of our options for hybrid cables and assemblies.

In this blog, we'll take a closer look at the step-by-step fiber optic cable manufacturing process, the materials used, and why these cables are so essential for our digital world.
