

Custom Process for High-Temperature Resistant Fiber Brackets for Relay Protection

Available in power, control and instrumentation, motion control, igniter, thermocouple, and RTD configurations, these cables feature durable glass-braid jackets, abrasion-resistant finishes, and high ...

Discover how FS end-to-end process, from in-depth consultation and precision design to rigorous validation, and then delivers tailored MTP®, standard, armored, and industrial fiber jumpers ...

A project the centre has recently worked on aims to develop an autonomous welding solution for the welding of pressure vessels for the nuclear industry. To achieve this, the team had to ...

From a simple custom bracket, temperature probe or complex wire harness, our engineers can design your assembly or build directly from your drawing. Selco handles the purchase and inventory of all ...

MEISU developed high-temperature resistant optical devices with SM fiber and PM fiber for fiber sensing system. By applying a special high-temperature coating to the normal PM fiber, it provides multiple ...

Specify, source, or browse high-performance thermal protection materials and high-temperature sealing solutions in the free product guide from Davlyn Group.

Dacon Systems can custom manufacture wire and cable to handle operating temperatures ranging from -60° Celsius up to +1200° Celsius. We also manufacture high temperature cable to meet a wide ...

For this type of application, we offer silica/sapphire assemblies for parts located in your high-temperature environment, as well as the use of sapphire windows at the end of your assembly to protect the ...

The combination of glass-yarn or mineral-yarn braids and materials such as polyimide, mica composite, and fluoropolymers (FEP, PFA, PTFE) enable us to manufacture specialised cables that withstand ...

Glenair ThermaRex interconnect solutions are designed to survive and excel in high continuous operating temperature application environments up to 600°C. For Electrical Wire Interconnect ...
