The consoles (PM100A, PM100D2, PM100D3, PM400, and PM5020) when paired with our extensive line of power and energy sensors provide calibrated (NIST traceable) measurements across a broad ...

Accurate optical power meters for -60 to +10 dBm, 750-1700 nm. Ideal for PICs, CPOs, automated testing, and general optical applications.

Choose the optical power meter you need to enable centralized control, flexible connectivity, and scalable measurement capability for optical component development or production test.

Compare features, electrical/mechanical specifications, and form factor. Discover the perfect optical power meter for your application.
