

OZ Optics offers a broad range of both variable and fixed attenuators having key competitive advantages. All of our attenuators operate over the two standard wavelength bands, the C-Band and ...

VIAMI offers the industry's most complete range of optical attenuators for installation and maintenance of singlemode and multimode fibers and advanced, photonic-layer solutions for lab and production ...

BeamQ Laser Benchtop Digital Variable Optical Attenuator - Benchtop digital variable optical attenuator support continuous optical attenuation up to 60dB at the calibration wavelengths of 850/ 1310/ ...

The OZ Optics DA-100 Series offers a compact, rugged and low cost digital attenuator with high resolution, high speed, high attenuation range and high power handling (blocking technique only).

MACOM's DSAs can be controlled with serial and parallel control allowing for best implementation for our customers. These products exhibit low insertion loss and high attenuation accuracy and are ...

Precision handheld instrument to test optical system margin & linearity. Superior specifications, high productivity and remote control make this a genuine laboratory instrument.

Thorlabs' Electronic Variable Optical Attenuators (EVOAs) offer in-line tabletop control of the optical power in a single mode optical fiber, including the ability to lock the optical output power at a user ...

DiCon's MEMS variable optical attenuator is a high quality VOA based on DiCon's industry proven MEMS mirror technology. These operate by collecting and collimating light from an input fiber and ...

OZ Optics offers a compact, rugged and low cost digital attenuator with high resolution, high speed, high attenuation range and high power handling (blocking technique only).

Upgrade optical control with Dual-Channel Optical Attenuator, featuring real-time monitoring, high accuracy of ± 0.3 dB and precision from 0 to -35 dB.

Digital Display Optical Attenuator
