

Dimensions and Specifications of German Explosion-Proof Distribution Boxes

• Equipped with specialized hinge structure, which can prevent the flameproof joints from damage when opening and closing the box, and greatly prolong the service life of box. The boxes can be combined ...

Are suitable to be used in hazardous areas for different applications, and can be used as push button stations, instrument housing, lighting distribution panels, power distribution panels, heat tracing ...

AGP17 ATEX and IECEx explosion-protected distribution boards are designed for MCB distribution of lighting circuits, heating circuits and socket distribution in Zone 1, 2, 21 and 22 hazardous areas.

Customizable configuration of operators, cable entry quantities and cable gland types as per specification. The enclosure series EJB forms the optimal basis for the application-specific ...

Box type product adopts high quality steel plate welding structure; the main cavity and auxiliary cavity are of up and down structure; wall type installation; bottom inlet, front operation and back overhauling.

Our explosion protection Ex enclosures and equipment are comprehensive and widely configurable. Reliable in use and convenient to install, their overall quality provides cost efficiency, and most of all, ...

Contact our experts or request a quote today. Degree of protection:IP66. Rated voltage:250/400V;50/60Hz.

Explosion proof junction boxes with detachable covers which are secured to the body by high tensile screws. Available in five sizes, these boxes provide a wide range of termination and distribution ...

The Ex d GUB series of enclosures is suitable for use in Gas Group IIC for the protection of electrical and control-system solutions, such as energy distribution, monitoring of processes and the complex ...
