

Distribution box 15kVA

This Energy Efficient Transformer is a 1 phase, 15kVA, that has a primary Voltage of 240 x 480V and a secondary voltage of 120/240V. The Enclosure has a NEMA 2 rating and has a box number of 17D ...

The NEMA 3R 15KVA transformer converts 480V power to single-phase 120/240V 60Hz and passes the current to the secondary side. The secondary side of the transformer contains a NEMA 3R 100-amp, ...

Protective Construction: Unlike many portable power distribution boxes made of plastic and utilizing thin gauge, low grade metals in their construction, this unit is designed for serious use and is ruggedly ...

These transformers are installed on the interior of the load center that has 27 spaces. With a rated power of 15kVA, it has a short circuit current of 18kA. The enclosure material is hot-rolled steel and is ...

Two rotating urethane casters in the front and two inflatable run-flat tires in the rear on this cart style mounting platform provides easier substation mobility, and a center point lift eye allows easy lifting ...

Transformer, 1-Phase, 15KVA, Primary: 190/208/220/240 x 380/416/440/480 Volts, Secondary: 120/240 Volts, NEMA 3R, Totally Enclosed Dry Type

Our 15kVA Portable Distribution Center Dual-Voltage unit is a robust, portable electrical distribution system designed for use in environments where temporary or remote power is required.

600V Class Commercial Encapsulated, Single Phase Distribution Transformer, 240x480 PV, 120/240 SV, 15 kVA
