

Earthquake-resistant accessories for cable trays

Our selection includes seismic-rated brackets, strut bracing, cable tray supports, diagonal bracing kits, and anchoring hardware engineered to stabilize horizontal and vertical runs.

The Easy ex EFSCK Series Seismic Cable Restraint Kits are engineered to secure suspended non-structural components--such as ductwork, piping, conduit, cable trays, and HVAC ...

The ease of creating fittings, carried out on site, as well as the wide range of unique and universal accessories gives complete freedom in routing combined with exceptionally fast installation.

Our team of experts can help you select the best cable tray series for your application, as well as designing your seismic bracing layout to ensure it meets applicable building codes and standards.

Tested by an independent lab and stamped by a Professional Engineer, the seismic cable kits are designed to brace non-structural equipment and distribution systems to help minimize damage from ...

This bracing kit is used to prevent damage to cable tray sections during earthquakes.

This article discusses the importance of seismic resistance for cable trays, detailing when seismic braces are necessary, the factors that affect seismic resistance, and how to ensure your ...

Seismic Cable Bracing Systems for Lighting or HVAC designed & engineered to limit sway during a seismic event. Strong, easy to install, and cost-effective.

Seismic bracing, typically made of high-strength metal, is key component specifically designed to enhance the stability and safety of cable tray systems during earthquakes.

We offer a pre-engineered, time-saving solution which braces and secures non-structural equipment within a building to minimize damage from earthquakes or seismic events.
