

Exfo optical multimeter

Leveraging leading expertise in fiber optic testing, EXFO's Optical Explorer is the industry's first OFM. Fiber optic tester that performs link verification and automated fault tracking in seconds. Empowering ...

EXFO's unique blend of equipment, software and services accelerate digital transformations related to fiber, 4G/LTE and 5G deployments

Available from Avalon Test Equipment, the EXFO Optical Explorer (OX1-PRO-MI) revolutionizes field fiber testing by combining power measurement, light source, and fault tracking into a single, intuitive ...

We're the communications industry's test, monitoring and analytics experts. Pioneering essential solutions and technologies for over 35 years +95% of the top CSPs worldwide use EXFO solutions

It delivers EXFO's tried and true OTDR quality and accuracy along with the best optical performance for right-first-time results, every time. The plug-and-play hardware options, like the VFL, power meter ...

Get equipped with the first optical fiber multimeter for ultrafast link verification and embedded fault tracking.

Enter the optical fiber multimeter. Invented by EXFO, it's a new category of specialized, essential tools that empower frontline technicians to do more. And it's the kind of innovation that only EXFO, backed ...

It's the first optical fiber multimeter--a new category of specialized tools empowering frontline technicians to do more while reducing OPEX and CAPEX.

Saves time by scanning and validating link quality in seconds, assigning a ratio of one to five stars using the EXFO function Advisor(TM) (patented) using sophisticated algorithms at the touch of a button.

OFMs quickly measure multiple key optical parameters such as loss (dB), optical return loss (dB), length (meters) and power (dBm). They help technicians verify fiber optic link health and troubleshoot ...

At EXFO we are dreamers and go-getters. We adapt and transform. Find out what's at the heart of EXFO.

Connect to EXFO Exchange, our open collaborative software platform that allows you to store and share test results while collaborating with team members. Create your own account or ...

EXFO Optical Xplorer is the first optical fiber multimeter designed for frontline field techs to easily evaluate fiber links and track faults within seconds!

Exfo optical multimeter

It's the first optical fiber multimeter (OFM)-an essential handheld tool for fiber optic technicians (it can be compared to multimeters used by electrical technicians). OFMs quickly measure multiple key optical ...

Available from Avalon Test Equipment, the EXFO Optical Explorer (OX1-PRO-MI) revolutionizes field fiber testing by combining power measurement, light source, ...

EXFO develops smarter test, monitoring and analytics solutions for the global communications industry. We are trusted advisers to fixed and mobile network operators, hyperscalers...
