

Fiber Optic Cable Drop Detector

Used to verify continuity, test and find breaks in fiber links, locate pinched fiber strands in termination cabinets, or anywhere fiber optic cables are terminated and subject to mechanical damage.

Equip your fiber optic toolkit with a reliable visual fault locator. Find options with long-range detection, universal connectivity, and portable designs.

By emitting a visible 650nm red laser, it provides a simple yet effective solution for identifying fault points in optical fibers, making it invaluable for technicians working in field operations and laboratory ...

Our unique Cold Clamp locates fiber optic cable breaks & faults to a physical accuracy of better than 1 meter over long distance. It causes a temporary optical loss marker at a location near the fault, ...

Fibertronics visual fault locators are great for use in fiber optic cable testing. They are adjustable from steady, to fast blinking, to slow blinking red laser light.

GAOTek underground optical fiber cable fault locator is an intelligent meter of a new generation for the detection of fiber communications systems.

Test your Fiber Optic cables with an OTDR from Fiber Savvy! We offer the latest variant types of the OTDR, Fiber Optic Identifier and also Visual Fault Locators (VFL) to help technician in the field ...

Want to quickly verify fiber activity, polarity, and connectivity without spending thousands? Now you can for less than \$200. Check out the FiberLert.

Find problems in seconds to reduce downtime and boost productivity! A fiber optic fault locator uncovers issues on complex, established networks and also supports new fiber link installations. Problems can ...

VisiFault Visual Fault Locator is a fiber optic visual fault locator by Fluke Networks that locates, verifies continuity, polarity of many near-end fiber faults with speed.
