

Fiber Optic Distribution Frame Chassis

Explore optical distribution frames (ODF) with efficient distributed chassis solutions at CommScope

You can build the optical distribution frame (ODF) system that conforms to your fiber distribution requirements, with three RFO frame formats and two RFO chassis for optimal connectivity, ...

Managing up to 3,168 fibers per frame, the FlexCore offering makes it easy to create multiple configurations using just three modular building blocks comprised of a 600mm frame and 150mm and ...

A range of single-unit frame and panel solutions for fiber splicing, adapters, connectors and multi-facility cable interconnections that protect fiber optic connections from damage.

Clearfield extends the flexibility of the Clearview ® Cassette to our FieldSmart ® frame and panel systems. Complete compatibility in footprint and route paths between the frames allow you to pick ...

C2X is an efficient and versatile fiber distribution platform. The C2X chassis" supports multiple patch, patch/splice and pre-terminated fiber configurations available in either bulkhead or module solutions.

Optical components can be housed in the flexible Clearview ® Cassette or in one of our four sizes of LGX style modules. The LGX and FieldSmart ® modules require an Optical Component Chassis to ...

Achieve successful cable management, handle high amounts of fiber cable and add density to fiber frames with the new DCX Optical Distribution Frame (ODF) System which features innovations like ...

CommScope's NG4access optical distribution frame (ODF) platform was built from the ground up to provide superior access to high density fiber terminations.

Amphenol Network Solutions Optical Distribution Frame (ODF), HyperX, provides a long-term solution for managing your growing fiber density. Unlike standard rack panels, they are modular and agile, ...
