

Fiber Optic Endface Inspection Instrument Lens

A fiber inspection scope is used to examine the polished end of a terminated fiber. The scope illuminates and magnifies the fiber tip so scratches and other defects can be seen.

Shop fiber optic inspection scopes, including single- and multi-fiber inspection products from trusted brands like Dimension, Domaille, Viavi, and Jonard.

Microscopes for network maintenance, lab and manufacturing to inspect the end face of single and multi-fiber connectors for scratches, defects and contamination.

It is used for high-precision inspection of fiber connector end faces in labs, production lines, and field maintenance, ensuring polishing quality and cleanliness.

The new D Scope EFI for MTP/MPO and multifibers field connectors is a cost effective microscope for inspecting fiber optic patchcords and cassettes. Easy to use, the D Scope EFI allows the operator to ...

Various instruments are used for inspecting bare or connectorized fiber endfaces: fiber microscopes, videoscopes and interferometric analyzers.

Dimension is committed to building a series of portable fiber optic end face probes/microscopes, becoming ideal tools for inspecting fiber connector end-face defects before and after network ...

This versatile tool supports single-mode (SM), multi-mode (MM), and polarization-maintaining (PM) fiber connectors, and is especially suitable for inspecting high-density connectors like MPO and MTRJ, as ...

The optical fiber end face detector uses a 3.5-inch display screen to enlarge the optical fiber end face image by 400 times. The optical fiber end face detector introduced by JILONG can detect male ...

AFL Fiber Inspection Products enable network technicians and other personnel to safely inspect fiber endfaces for contamination and verify the effectiveness of fiber cleaning procedures.
