

Fiber optic cables connecting major continents

Explore the world beneath the waves with EarthLink. Learn how fiber optic cables span oceans, connect continents, and power the global internet.

Map shows all the underwater fiber optic cables that crisscross the planet earth.

This interactive submarine cable map shows global undersea and underwater fiber optic cables connecting continents and countries worldwide. Explore cable routes, landing stations, system status ...

Explore the physical backbone of the internet with our interactive map of undersea fiber optic cables, peering exchange points, and more. Visualize the growth of global connectivity.

Google has backed at least 14 cables globally. Amazon, Facebook and Microsoft have invested in others, connecting data centers in North America, South America, Asia, Europe and ...

See the world internet cable map and learn how global internet connections actually work. Updated visuals show undersea cables, chokepoints, Africa's expansion, and what happens when cables fail.

See the world internet cable map and learn how global internet connections actually work. Updated visuals show undersea cables, chokepoints, Africa's expansion, ...

The internet connects countries and continents primarily through submarine fiber optic cables that run under oceans. These high-capacity cables transmit data using light signals, enabling ...

Fiber maps visualize the global network of fiber optic cables, showcasing how data moves across continents and under oceans. Telecommunications providers rely on these maps to optimize routing, ...

Submarine fiber optic cables have revolutionized global communication by seamlessly connecting continents and enabling the transfer of vast amounts of information at incredible speeds.

Fibre-optic Link Around the Globe (FLAG) is a 28,000-kilometre-long (17,398 mi; 15,119 nmi) fibre optic mostly- submarine communications cable that connects the United Kingdom, Japan, India, and many ...
