

# Fiber optic circulator single pole

Single mode fiber 1310nm, 1550nm or other wavelength optical circulator Product Description: Optical Circulator is a non-reciprocal device that directs light from port1 to port2 while guiding light from port2 ...

Optical Circulators are passive devices that enable you to cost effectively double your fibre capacity without having to install more fibre or expensive active equipment.

Thorlabs" Single Mode (SM) Optic Circulators are non-reciprocating, one directional, three-port devices that are used in a wide range of optical setups and for numerous applications.

These circulators have a maximum power handling of 500 mW (CW). Fiber optic circulators are non-reciprocating, one directional, three-port devices that are used in a wide range of optical setups and ...

LBTEK"s fiber optic circulator is a three-port non-reciprocal optical device where light can only propagate in one direction. If the signal is input from port 1, it outputs from port 2; if the signal is input from port ...

They are available with either singlemode or polarization maintaining fiber. OZ Optics" PM fiber optic circulators are manufactured with polarization maintaining fibers, making them ideal for polarization ...

High-performance 1310 nm Single Mode Fiber Optic Circulator with FC/PC connectors, offering low insertion loss and high isolation for bidirectional signal transmission.

Fiber Optic Circulators Features: o Low insertion loss o Miniature packages o High power handling o Wide wavelength range o Low cross talk o Center wavelengths 780, 850, 1060, 1310, 1480, 1550 nm o Low ...

We offer a comprehensive selection of fiber optic isolators and circulators, perfected over 25 years of volume production to cover most application scenarios.

LFIBER provides in-line fiber optical circulators, including high-power fiber circulators, single-mode & multimode fiber circulators, polarization-independent & polarization-maintaining optical circulators.
