

Genuine EDFA product with low temperature resistance

With more than 15 years of double-clad fiber processing experience, industry-leading fiber processing equipment and test equipment, Connet's high-power Erbium-Ytterbium co-doped fiber amplifier ...

PriTel, Inc. manufactures fiber lasers, EDFA fiber amplifiers, optical pulse compressors, and optical multipliers. PriTel's products are ideal for use in fiberoptic communications at bit rates of 2.5, 10, 40, ...

Our EDFAs are engineered to boost your laser's output power while retaining its critical beam properties--such as linewidth, pulse width, and beam profile--ensuring precision performance in ...

The product has the advantages of high reliability, high power output, high gain, and low noise. Two configurations are available: A preamplifier for slight optical signal amplification and a Booster ...

Thorlabs' core-pumped erbium-doped fiber amplifiers (EDFAs) provide high small signal gains and output powers in a compact, turnkey benchtop package or a plug-in PXIe module with FC/APC (2.0 ...

The typical small signal gain is as high as 35~45 dB, and it has a low noise figure. It is usually used before photodetectors to improve their detection capabilities for weak optical signals.

Combined with Evertz optical transmitters, receivers and DWDM multiplexing products, the 9000EDFA series amplifiers offer a complete solution for long haul signal transmission.

54 suppliers for erbium-doped fiber amplifiers (EDFA) are listed in the RP Photonics Buyer's Guide, out of which 8 present their product descriptions and images.

The EDFAs feature high output power, high gain with very low noise, and they can be customized to accommodate a wide range of input signal levels. They are thus ideal for various demanding ...
