

Greek Fiber Reinforced Pad 2 Cores

Custom, durable bearing pad & shim options for any precast/prestressed concrete application - ROF cross-ply material, high-capacity duck pad, molded neoprene, Dynalon slide bearings, & Shimmers ...

VibSORB Elastomeric ROF pad is available in the following thickness 1/4", 1/2", 3/4", 1" and 2". Additional thickness and custom fabrication is available upon request.

UltraLite® is strengthened by miles of fiber in each square foot of fiber-cement coating which also provides excellent resistance to cracking or breaking. The concrete outer skin and EPS foam inner ...

Commonly used in precast concrete construction, VOSSCO® serves as an economic bearing or bedding pad in applications such as: Box beam or hollow core plank bearing strips

Strengthen your building and repair projects with high-quality rebar that enhances the durability of concrete. Ideal for foundations, driveways and structural reinforcements, these steel rods add tensile ...

FORTA is a global leader in reinforcement fiber products, enhancing material performance and long-term durability in concrete, asphalt, and other applications by minimizing cracking and improving ...

Fabreeka pad can be used as a bearing pad as well as for isolation washers, bushings and OEM parts. Fabreeka pad has been used for over 80 years for mounting heavy machinery where absorption of ...

Also called thermal insulation material, thermal break bearings are made from fiberglass-reinforced laminate. They are designed to maintain structural integrity while minimizing heat loss.

Uniquely graded fiber design to minimize voids in the concrete matrix. Cost-effective, three-dimensional reinforcement alternative to secondary wire mesh or rebar, and steel fibers.

The properties of the Fabreeka cotton duck pad are exceptionally suited for impact shock control, vibration isolation and structure-borne noise insulation. Fabreeka pad can be used as a bearing pad ...
