

Guinea Well Temperature Measurement Optical Cable Brand

It integrates product development, production and sales to provide high-quality products and solutions for the field of optical fiber sensing, military communications, and civilian communications.

DTSX measures temperature distribution over the length of an optical fiber cable using the fiber itself as the sensing element and it is ideal for temperature monitoring over long distances and wide areas.

Fibercore specializes in the harshest of environments, ranging from cryogenic applications to the some of the hottest enhanced oil recovery wells. Fibercore extends to a network of manufacturing facilities, ...

Utilizing Multi-mode Fiber Optic cables, Distributed Temperature Sensing (DTS) provides quality downhole temperature data and is applicable in a wide variety of applications.

NovaPTTM-D is a patented and field-proven fiber optic pressure and temperature sensor system for permanent downhole installation. The sensor is built with a monolithic single-crystal sapphire ...

Recognized as a leading developer and manufacturer of fiber optic temperature sensing and partial discharge monitoring products, providing solutions for a multitude of industrial applications. Cost ...

Rugged and reliable structural monitoring solutions help ensure the safety and security of our civil and geotechnical infrastructure. Luna's measurement systems can provide all the real-time data needed ...

The ZeGage Optical Profiler employs low coherence interference patterns to measure surface profiles with nanometer precision, making it ideal for capturing the detailed topography of ...

6.35mm permanent oil well sensing optical cable is a professional sensing optical cable for underground temperature and perturbation monitoring. The optical cable adopts seamless steel pipe and high ...

6.35mm permanent oil well sensing optical cable is a professional sensing optical cable for underground temperature and perturbation monitoring. The optical cable ...

Our DPTS technology is a novel, low-cost solution for permanent, downhole pressure and temperature measurements for the Oil & Gas industry.
