

H3Cs7506 Core Switch Throughput

H3C S7500X switch series is the first of its kinds in the industry to support wire speed performance for high density 10G/40G/100G line cards and can meet the existing and future application requirements ...

MDC technology allows you to virtualize a single S7500X switch as multiple logical switches, allowing you to use a single core switch to support multiple services.

H3C S7500 Series Ethernet Switches are a line of modular, high-capacity, wire-speed Layer 2/3 Ethernet switches designed for enterprise and service provider networks. They offer scalability, high ...

MDC virtualizes one S7500X switch into multiple logical switches, enabling multiple services to share one core switch. The 1:N virtualization maximizes switch utilization, reduces network TCO, and ...
