

# Immersion Liquid Cooling Installation Solution for a 19-inch Chassis in Haiti

Designed to fit standard 19-inch racks, our solution seamlessly integrates into your existing infrastructure. The modular setup allows for quick, hassle-free upgrades, providing flexibility for future ...

As computing power constantly increases, liquid cooling becomes a necessary solution to replace conventional air cooling. DCX Immersion Systems stands out as the most powerful, compact, ...

Here's the kicker: LiquidCool Solutions is the only company that combines total liquid immersion with directed flow--direct-to-chip cooling--all within a standard 19-inch rack.

This rugged, stand-alone 19-inch rack-mount chassis provides a top-load solution for high-power 6U VPX modules. Heat collection is achieved using liquid flow-through sidewalls of a one air transport ...

Our solution architects design tailor-made server, storage, and software solutions for immersion cooling, whether deployed from scratch or integrated into existing systems, ensuring technical, business, and ...

Discover our range of submerged servers designed and ready for immersion cooling in 19" or 21" and our partners.

Discover the iXora HRM-4: a compact immersion cooling system designed for 19" rack-based deployments. Achieve up to 50% energy savings, 100% heat capture, and industry-leading cooling ...

Cut energy costs and extend hardware life with next-gen Liquid Immersion Cooling Tanks built for higher compute density in a smaller footprint. Dense data center loads need consistent, tunable ...

Submerge your server into a bath of non-conductive liquid and allow thermal generated by computer components to be transmitted into the fluid and cooled using either a single-phase or two-phase ...

LiquidCool Solutions is the only company combining Total Liquid Immersion with Directed Flow (direct-to-chip) in a standard 19" rack. Because liquid cools 1,000x better than air, we can provide high ...
