

India High-Temperature Temperature Measurement Optical Cable Factory

The OS4000 series high speed industrial fiber optic infrared transmitters measure temperature ranges from 200 to 1600°C (392 to 2912°F) using three standard optical fields of view and three standard ...

The TST cable gallium arsenide optical fiber temperature measurement system is not only a technical innovation, but also a key infrastructure for the transformation of power systems to ...

It is integrated by fiber optics, optoelectronics, and high-speed signal acquisition. The embedded software and hardware make it very stable, compact, and low power consumption. The TATUS has ...

Hi Temp Solutions is continuously expanding its global presence in order to achieve its vision of becoming one of the leading temperature sensors manufacturers globally.

Not only can DTS fiber optic cable be deployed over a long distance but it also provides a high resolution profile of the area as well as accurate and precise temperature measurement over that ...

JMV's Distributed Temperature Sensing (DTS) system provides continuous temperature monitoring along the entire length of an optical fibre. This solution ensures early detection of heat anomalies to ...

Our range of products include Thermal Imaging Cameras, Fiber Optic Temperature Cable, Infrared Thermal Imaging Camera, Calibration Equipment, Ethernet Cable and Lumasenses Pymeter.

Based on the determined temperature profile, the FireLaser Sensor Control Unit generates alarms. So, with unparalleled accuracy, the FireLaser Distributed Temperature Sensing System can locate a hot ...

Fiber optic temperature sensor, Distributed fiber optic temperature measurement system, Fiber optic temperature sensor for transformer, Advanced production technology is used to manufacture fiber ...

We are a thermal engineering and specialized cable manufacturer established in 1990. Our products include contact and infrared temperature sensors, a range of specialised cables and conductors, ...
