

Industrial-grade exchanger

dustproof

power

Its weatherproof IP67 (waterproof and dustproof) rating, vast operating ...

These environmentally sealed Power Connectors have been designed into a wide range of markets such as Industrial, Automotive and Marine - Setting the gold standard for Dust and Waterproof ...

Connects two Cat5e/6 patch cables in industrial environments that require protection against dust, debris and moisture.

Featuring tool-free installation options, these rugged, industrial-grade solutions simplify maintenance tasks, reduce installation time and enhance operational efficiency in hazardous locations.

Its weatherproof IP67 (waterproof and dustproof) rating, vast operating temperature range of -4 to 140°F (-20 to 60°C) and vandal-proof IK10 score enable this Media Converter and Power over Ethernet ...

Its weatherproof IP67 (waterproof and dustproof) rating, vast operating temperature range of -4 - 167°F and vandal-proof IK10 score make this Power over Ethernet injector able to withstand harsh ...

With IP67 water-resistant protection, Arkpax products provide reliable and scalable power solutions designed to meet the rigorous demands of businesses in challenging industries.

Installing the unit on a heatsinking surface significantly improves cooling and achieves higher output power. The series accepts either AC- or DC- inputs with wide input ranges.

A complete collection of watertight devices for demanding industrial environments including connectors, inlets, outlets, covers and rugged FD boxes that allows mounting of single-gang devices in multi ...

Connects two Cat5e/6 patch cables in industrial environments that require ...

This design allows us to easily change outputs to meet differing applications, essentially, a tailor made power supply for the OEM without the expensive NRE charges. A critical design criteria for our ...

This robust heat exchanger features a double-crimped and dip-sealed core, allowing efficient thermal transfer while ensuring maximum protection against leaks.
