

## Iran's core switch NRZ

It extends Iran's anti-access or "area denial" bubble deep into the Gulf. Radars here track incoming allied warships and cargo vessels long before they reach the choke point.

The U.S. showed little immediate enthusiasm for a new Iranian proposal that would end the war and reopen the Strait of Hormuz without resolving the impasse over the Islamic Republic's nuclear...

Iranian authorities are moving quickly to launch a new project designed to make it possible to cut the country off from the global internet completely and for extended periods, ...

Iran deployed Russian technology to shut down Starlink. Now protesters are back online -- for now.

According to US officials quoted by the New York Times, Iran has indicated that it cannot locate all of the mines that it has laid and lacks the capability to remove them.

Updated on Jan. 13 with new reports into Starlink restrictions and users being hunted down by the Iranian authorities, as well as Musk's offer of free connectivity.

U.S. Central Command announced the blockade would involve all Iranian ports, beginning on Monday at 10 a.m. EDT, or 5:30 p.m. in Iran, to be "enforced impartially against vessels ...

It extends Iran's anti-access or "area denial" bubble deep into the Gulf. Radars here track incoming allied warships and cargo vessels long before ...

As widespread protests enter their second week, the Iranian regime has reportedly triggered an internet "kill switch". A cybersecurity expert has claimed that the switch has been flipped ...

The jamming of GPS signals, which began after the 12-day war with Israel last summer, allowed Iran to locally "blind" satellite terminals, creating zones of near-total digital silence.

But how exactly is Iran jamming Starlink internet service? The satellite provider -- owned by Elon Musk's rocket company SpaceX -- has been one way for people to get around Tehran's...
