

Iran says it attacked US Navy ships after they targeted Iranian tanker US military says it intercepted and responded to "unprovoked" Iranian attack, stressing that it doesn't seek escalation.

Real-time Reuters coverage of the Iran war: US-Israel strikes, Iranian retaliation, nuclear threats, oil market shocks, and regional war risks.

This paper presents the design and simulation of an AlGaAs-based Vertical Cavity Surface Emitting Laser (VCSEL) with a curved bottom Distributed Bragg Reflector (DBR), operating ...

An Iranian cultural renaissance in the late 8th century led to a reawakening of Persian literary culture, though the Persian language was now highly Arabized and in Arabic script, and ...

AR-VCSEL stands out among semiconductor lasers, offering a well-balanced power density and brightness, making it a cost-effective solution for long-distance LiDARs. The ...

The exchange was the latest twist in a week of mixed signals in the region and tensions over the Strait of Hormuz, as President Trump searches for an off-ramp in the war that he started.

Contrary to the conventional Fabry-Perot edge-emitting semiconductor lasers, his invention comprises a short laser cavity less than 1/10 of the edge-emitting lasers vertical to a wafer surface.

Iranian, by contrast, describes the citizens and peoples of the modern country of Iran--a diverse nation shaped by many ethnic groups, languages and historical experiences.

The chapter focusses on fundamental aspects such as the VCSEL device structure, including the distributed Bragg reflector mirrors, the optical cavity and various emission wavelengths, and the ...

The technology landscape has seen remarkable innovations, with one such groundbreaking advancement being the Vertical Cavity Surface Emitting Laser (VCSEL). VCSELs ...

A specific photonics technology that shows great promise for high speed intra-satellite data transfer applications is the Vertical Cavity Surface Emitting Laser diode (VCSEL). It is a semiconductor ...

Design and simulation of AlGaAs curved mirror vertical cavity surface emitting laser [13384-23]

Vertical-cavity surface-emitting lasers (VCSELs), featuring the advantages of low energy consumption,

Iranian Vertical Cavity Surface Emitting Laser QSFP28

miniaturization, and high-beam quality, show potential for

The vertical-cavity surface-emitting laser (VCSEL) physics and the progress of technology covering the spectral band from infrared to ultraviolet is reviewed by featuring materials ...

VCSEL laser is a surface-emitting semiconductor light source that emits laser beams in a direction perpendicular to its top surface. Its major application fields are LiDAR systems, telecom, 3D ...

Iranian media have welcomed Beijing's unusually sharp rhetoric in support of Tehran, portraying recent Chinese diplomacy as evidence of a deepening strategic partnership.
