

# Lao supplier of compatible 400G pluggable optical modules

This module can convert 8-channel 53.125Gb/s electrical data to 4-channel 106.25Gb/s optical signals and multiplex them into a single channel for 425Gb/s optical transmission.

200G/400G/800G optical module features up to 40km transmission distances using QSFP56/QSFP-DD footprints for data center interconnect applications - FiberMall

This article explores how to interconnect OSFP and QSFP-DD ports in 400G/800G networks, covering key principles, form factor differences, and practical solutions for stable, high-speed data center ...

400G QSFP-DD & OSFP Transceivers High-Capacity Data & Telecom Compact, hot-pluggable modules with advanced diagnostics and connector options (LC, MPO, MPO-16).

Equipment and electrical serdes can evolve through 3 generations (25 Gb/s, 50 Gb/s or 100 Gb/s) without changing the optical interface that interconnects your equipment.

Features and benefits As line card ports become universal, it is possible to design new line cards optimized for 400G, knowing that by simply replacing the pluggable, the port can support bitrates ...

The 400G transceiver modules are ideal choice for AI data centers, enterprise networks and service provider networks. Click to get your 400G transceiver modules and cables from nearby warehouses. ...

Our pluggable coherent optical modules support a variety of data rates, including 100Gb/s and 400Gb/s to enable application optimization based on capacity, distance and port type.

Does this product support customization? How do you ship the products? What is the warranty for the product? Once receive your question, the supplier will answer you as soon as possible.

All Juniper qualified 400G optics are compliant with key industry standards and specifications for seamless interoperability in multivendor environments.
