

Large-pair optical cables and optical fibers

Industrial Fiber Optics is a world leader in manufacturing polymer and large-core silica optical fiber cable assemblies. We specialize in providing leading edge solutions and manufacturing technology ...

Today, there are more than five billion kilometers of fiber cable installed around the globe, and Corning continues to lead the fiber optic cable industry in product quality and innovation.

Sumitomo Electric solves your business problems by providing high quality, high performance pliable fiber optic ribbon cables. Compared to conventional optical cables, Sumitomo Electric can reduce ...

Expert advice on fiber optic installation, including cable length calculations, single mode vs. multi mode fibers, and environmental considerations.

Once you get a chance to handle this cable and see how big, stiff and heavy it really is, you understand that it's quite different from any fiber optic cable you have worked with, with the possible exception of ...

Shop DigiKey's large in-stock selection of Fiber Optic Cables. View inventory, pricing and order now for same day shipping!

The plethora of fiber optic cable types can seem overwhelming, but choosing the right cable for the job is important. Read on to learn what fiber optic cables are and which cables you need.

Multifiber cables can have anywhere from a few pairs to several hundred pairs of fibers. The term "fiber pair" refers to two optical fibers that are typically used together to form a bi-directional communication ...

Learn all about the differences between single mode and multimode cables, as well as the various fiber wavelengths and standard core sizes used in fiber optics.

A professional reference for fiber optic sizes, measurement standards, and how to select the right fiber for your application
