

Lebanon Cold Aisle IP68

Our aisle containment systems are vendor agnostic, featuring innovative, transparent panels that are lightweight and easily attached horizontally or vertically to cabinets using a universal rail system. ...

Enhance data center cooling efficiency with this door frame adapter. It easily integrates with existing cold and hot aisle containment system, improving temperature control and overall performance.

Modular sliding or swinging door versions available with optional "soft" self-closing mechanisms and hold-open provisions. Accommodates aisle widths from 36" wide to 96" wide. Standard ...

Door Options A choice of door options is available for use with the aisle containment system to provide the right combination of safety and security. Dual sliding doors or Vertical doors can be chosen for ...

Cold aisle containment works in virtually any data center using traditional air cooling, but some facilities see faster returns than others. If you're delivering cold air through a raised floor with perforated tiles, ...

Find out how to improve your data center infrastructure efficiency, using the cold aisle containment or hot aisle containment solutions from Vertiv.

By isolating the cold aisle, containment reduces unintended mixing of cold supply air with hot exhaust air, maintaining uniform, predictable temperatures across all racks.

Modular designed frame made of cold roll steel, with thickness $\geq 1.2\text{mm}$ to ensure the firmness and security. Aisle containment in the data center requires that cabinets are aligned in a hot aisle/cold ...

Ceilings span the gap across the top of cabinets in cold aisle containment. They keep cold and hot air from mixing and are available in several styles to best suit your application.

The aisle containment system is a modular rowbased thermal containment solution, which separates cold and hot data center air streams to and from equipment. It manages airflow at the source, ...
