

Luxembourg Enterprise-Grade 400G Optical Router

400Gbit/s edge routers seamlessly integrate into existing IP and optical networks, enabling capacity upgrades without major network redesigns or service disruption.

Discover the latest advances in router-based optics, from 400G to 800G modules.

Huawei's 400G networks can achieve transmission distances 1000 kilometres further than the industry average, with 20% better performance. With overall transmission performance increased ...

This guide covers all you need to know about 400G, the technology that supports it, and how it is being used in the marketplace.

Rapid advances in silicon are fueling a new generation of pluggable coherent 400G router optics that open exciting new avenues for rethinking IP-optical network designs. This white paper takes a closer ...

In March 2021, Smartoptics announced that service provider POST Luxembourg had chosen the Smartoptics open line system for upgrading its backbone network to 400G.

For the most demanding environments the 400G routing and switching platforms provide flexibility and choice for large scale cloud, leaf and spine, routing transformation and hyperscale IO intensive ...

The new networking solution will enable POST Luxembourg to maintain its position as a leader in the communication industry by offering high-speed access to both business and residential ...

Post Luxembourg has selected Smartoptics as a supplier of optical connectivity for the project. To meet these bandwidth requirements, the network will be designed to fully support the new 400ZR standard ...

Transmit 400G wavelengths up to 120 km with coherent ZR, and long-haul transmission with OpenZR+. Connect unamplified links point-to-point up to 45 km with 400G coherent wavelengths. Get optical ...
