

New Nan Ya PLC Splitter

Ours" PLC splitters are based on planar lightwave circuit technology and high-precision alignment. PLC splitters can split or combine light from one or two fibers into multi-outgoing fibers uniformly over a ...

Engineered with advanced planar lightwave circuit technology, our splitters ensure uniform signal splitting, low insertion loss, and excellent stability--even in demanding network environments.

39 Reviews New +NaN 1 x 2 Single Mode PLC Splitter, Standard FHD® Cassette, SC/APC 50:50 | $\leq 4.1\text{dB IL}$ | $\leq 0.2\text{dB PDL}$ | FHD Box SGD54.50 (Incl. GST) 172 Sold

The splitters are based on plasma chemical vapor deposition technology and a patented fabrication process. They offer stable performance, high reliability, and specifications that exceed Telcordia ...

They perform uniformly over a wide spectral range, with ultra-low losses. Available in different packages like 250um, 900um, box or cassette, terminated with or without connectors.

A move towards PON"s within the FTTX arena calls for a device offering low insertions loss, linear uniformity and high return loss, our splitters provide excellent specifications as well as complying to ...

This section provides an overview for plc splitters as well as their applications and principles. Also, please take a look at the list of 54 plc splitter manufacturers and their company rankings.

Power your fiber networks with high-performance PLC splitters. Global B2B manufacturer offering bulk optical splitting solutions with precise insertion loss control.

Learn everything about PLC Splitter: what they are, how they work, and how to source the right one for your network. Complete buyer"s guide.

Planar Lightwave Circuit (PLC) splitter is a key component in FTTx network and is responsible for distribution and converging of the optical power in ODN network by dividing an optical signal from ...

We offer fiber optic PLC splitters in various configurations, including 1×2, 1×3, and 1×N, catering to optical fiber CATV systems and other network applications.

Our rack PLC splitters provide excellent channel-to-channel uniformity, high reliability, and a wide operating wavelength range. They are ideal for use in data centers, telecommunications networks ...
