

New Type of Power Optical Cable Company

This is a family of small form-factor hybrid Active Optical Cable assemblies, performing E-O/O-E within a single cable designed to accommodate longer distances, greater bandwidth and increased power ...

We deliver optical connectivity solutions for every segment of the network, including carriers, data centers, in-building networks, and original equipment manufacturers (OEM).

Our Power+(TM) composite fiber cable delivers remote power and network connectivity beyond 100 meters for PTZ cameras, DAS, and PON applications.

We now produce more than 100 types of cable designs for a wide range of applications. These include outdoor and indoor cables, OPGW, fire rated cables, and sensor cables. We also ...

The company, established in 1898 and ISO 9001:2015 certified, produces twin axial, coaxial, miniature, microminiature, hybrid, multi-conductor, flexible, power distribution, reinforced ...

Those purple cables are the signature offering of Credo, a 17-year-old Silicon Valley-based semiconductor company whose name rarely gets mentioned alongside the leaders of the AI ...

Engineered for resilience and performance, our range of medium to extra high voltage and solar cables are crafted with precision to withstand the most demanding conditions, ensuring uninterrupted power ...

CommScope solves these challenges with a complete range of powered fiber solutions designed for just the kind of high-demand powered devices that power smart networks in healthcare, hospitality, ...

Step into the future of passive optical networking with Precision OT. Meet OpenPath, the groundbreaking, end-to-end PON access solution crafted by our team of experts.
