

New type of loose tube optical cable

AFL has developed the next-generation of high-performance 600-lb rated micro-loose tube cable for the communications cabling infrastructure market.

Discover our loose tube cables for indoor and outdoor use with high fiber density. Robust and reliable solutions for your needs.

Explore the differences between tight-buffered and loose-tube fiber optic cables. Learn the fundamentals of cable construction and identify the most suitable fiber optic cable for your specific ...

Leviton loose tube fiber optic cables are available in unitube or multi loose tube constructions with a wide range of fiber count, fiber type, and sheath options, including duct, rodent resistant, and direct ...

Belden's Multi-Loose Tube (MLT) Cables are ideal for indoor/outdoor applications, including use in conduit, direct burial, lashed aerial and trunking applications.

With advancements in manufacturing technologies, improved materials, and development of bend-insensitive optical fibers, AFL has developed the next-generation of high-performance 600-lb ...

Compared to central tube cables, loose tube fiber cables are more flexible and have a lower minimum bend radius, making it easier to store cable ...

Multiple 250 m strands of fiber form a loose tube fiber cable that can be manufactured dry-laid or gel-filled. Both buildings offer some degree of protection against water ingress. An outer ...

Reliable and efficient, our loose tube fiber optic cables feature innovative loose tube construction for maximum protection, making them ideal for aerial and buried applications.

The new high-density ALTOS HD cable with binderless FastAccess technology features 24 fibers per buffer tube in a compact yet flexible design, offering reduced outer diameter, weight, and carbon ...

Compared to central tube cables, loose tube fiber cables are more flexible and have a lower minimum bend radius, making it easier to store cable slack for later splicing or customer ...
