

Non-metallic optical fiber cable for communication

OFC-LT-NM fibre optic cables are an ideal solution to future proof an installation. They provide very high-speed data transmission over greater bandwidths compared to traditional copper cabling and ...

GYFTY63 Single Jacket None Metallic optical fiber cable are designed to provide high fiber counts with the flexibility and versatility required for today's most demanding installations, including duct and ...

This fiber optic duct cable is composed of non metallic structure. It has good anti electromagnetic, anti static and lightning performance.

As its name indicates, there is no support or messenger wire required, so installation is achieved in a single pass, making ADSS an economical and simple means of building a fiber optic network.

Non-armored stranded loose tube fiber optic cable features FRP as the central member, ensuring the resistance to electromagnetic interference. High strength loose tube is hydrolysis resistant and the ...

The fiber, either single-mode or multimode type, are positioned in a loose tube made of a high modulus plastic. The tubes are filled with a water-resistant filling compound. A Fiber Reinforced Plastic (FRP) ...

Fiber optic cables are designed to provide high-speed, no-signal-loss, and EMI-free communication in telecommunication, powergrid, datacenter, broadband, and industrial applications.

ETK Kablo manufactures non-metallic armored cables in multiple configurations to meet varied bandwidth and distance requirements: Each cable is engineered for low attenuation, stable optical ...

- Non-metal central strength has a excellent anti-electromagnetic ability. - Water blocking system provide reliable performance of moisture-proof and water block. - The fiber reinforced plastic and ...

Our revolutionary, one-of-a-kind OptiTuff Mini Fiber Cable utilizes advanced, ruggedized thermoplastic material as a cost-effective, top-quality alternative to traditional metal armored cable. Compared to ...
