

Nuferm large core diameter optical fiber

mechanical and geometrical tolerances. This fiber features a 150 micron core diameter, 0.22 NA and is available with a silicone coating and a transparent nylon buffer. All fiber is proof tested to > 1

This application note has provided details on using Nuferm's Ultra-High NA optical fibers as a low loss bridge from SMF28 to Silicon waveguides, including, a simple Silicon waveguide mode converter ...

LMA Yb-doped fibers enable efficient, compact, diode pumped fiber sources that are an attractive alternative to traditional solid-state lasers. This fiber features a single mode large core/cladding ratio ...

Coherent NuBEAM are low loss, high damage threshold, multi-mode, beam delivery fibers that transmit higher powers in solid-state, fiber, and diode lasers systems.

Multimode fiber (MMF) uses a larger core diameter (typically 50 or 62.5 microns) allowing multiple light modes to propagate, suitable for short distances. In contrast, single mode fiber (SMF) ...

These Ultra-High-NA (UHNA) Single Mode Fibers offer numerical apertures up to 0.41 for efficient coupling with certain non-silica fibers and planar waveguides, such as fluoride fibers, chalcogenide ...

Manufactures specialty optical fibers, precision optical fiber gyro coils, fiber lasers and amplifiers. We design, manufacture, test and qualify highly-engineered fiber-based products for diverse applications ...

Nuferm's 780-HP high-performance select cut-off single-mode fiber is optimized at near IR wavelengths. This application-specific fiber was developed for applications requiring coupler generation, diode ...

Nuferm's specialty multi-mode fibers are ideal for a variety of diverse applications. They are capable of withstanding extreme environments and large temperature swings. Features include step index and ...

Nuferm's Large Mode Area (LMA) Ytterbium-doped double clad fiber is ideal for high power fiber lasers and amplifiers used in military, industrial, and medical applications. These fibers enable efficient, ...
