

OTDR Optical Time Domain Reflectometer 6000

By detecting reflected signals in optical fibers, OTDR can quickly locate fault points such as breakpoints, poor fusion splicing, and excessive bending in optical fibers, providing important basis for the ...

The NK6000 series optical time domain reflectometer is a high-performance multi-functional test instrument designed for FTTx networks.

The Uniway 6000L OTDR (Optical Time Domain Reflectometer) is a highly efficient and reliable tool designed for testing and troubleshooting optical fiber networks.

The RT6000-OTDR enables plug-and-play deployment via Ethernet, delivering rapid and efficient data transfer, analysis, and storage capabilities. Its core features include smart comparative analysis ...

NK6000 is a SM Optical Time Domain Reflectometer OTDR with multi-function OPM VFL LS 35/33dB 1310/1550nm

Short lead time, Deliver on time, Strict quality checking before shipment. Our professional sales team win the reputation in home and abroad with the outstanding service and high quality products.

Baudcom 6000 series OTDR can used to test single-mode wavelengths of 1310nm, 1550nm, 1490nm, 1625nm and 1650nm, multi-mode wavelengths of 850nm and 1300nm as well as customized special ...

The JDSU T-Berd 6000 is a handheld optical time-domain reflectometer (OTDR) for testing and troubleshooting single-mode optical fiber networks. It features a dynamic range of up to 40 dB and a ...

NK6000 series optical time domain reflectometer is a new generation of portable and intelligent measuring instrument designed for testing optical fiber communication system.

Baudcom 6000 series OTDR can used to test single-mode ...

The JDSU T-BERD/MTS-6000 is a highly integrated test platform for all fiber network life cycle phases. It provides field service technicians with the highest levels of performance and ...
