

# Optical Module LC Small Port

SEL ICON and SEL-2730M make use of small form-factor pluggable (SFP) transceivers for fiber optic communication. See the range of SFP data rate and distance options supported.

While both SC SFP module and LC SFP module serve the same purpose of establishing a connection between the network device and fiber optic cable, they differ significantly in design, ...

The new Intellinet Network Solutions Small Form Factor Pluggable (SFP) Transceiver provides the best combination of performance and affordability. This mini-GBIC (Gigabit Interface Converter) module ...

LC is the default and most widely used fiber optic connector for SFP modules due to its small size and broad compatibility. It is designed specifically to support high port density without compromising ...

Each single mode SFP transceiver is equipped with a duplex LC fiber connection interface, and supports high-speed data rates up to 1.25Gbps. All TRENDnet SFP fiber modules support connections for ...

The MOD-MGBIC-LX is a Small Form Factor Pluggable (SFP) transceiver modules that is specifically designed for high performance integrated duplex data link over single mode optical fiber. These ...

Discover the difference between LC SFP vs SC SFP modules. Get comprehensive insights and comparisons to make an informed decision.

Small Form-factor Pluggable (SFP) transceiver module with Lucent Connector (LC) were created to ensure good connectivity with low signal loss and wide bandwidth.

This data sheet describes the benefits, specifications, and ordering information for the Cisco SFP Modules for Gigabit Ethernet Applications.

Confused about the LC vs SC SFP module choice? We explain the physical differences, density benefits, and why Wolontek recommends LC for data centers and SC for FTTH.
