

Optical Module Protector

Optical module housing, also known as transceiver housing or optic module enclosure, is a protective casing designed to hold and protect optical modules used in various communication and networking ...

Protects optical test ports' internal (calibrated) end-face from the damage associated with repeated mating and contamination. Avoids costly repairs due to damaged connectors. Eliminates the costly ...

GLSUN offers OLP optical line protection series products can be used to protect the network transmission line and realize optical power monitoring and automatic switching.

Provide reliable protection for your optics with our 100-pack Dust Covers that protect your MPO or MTP QSFP+ QSFP28 Optical Modules from dust and debris.

Made of durable and soft silicone material, it tightly fits the SFP optical port slot, effectively isolating dust and impurities, and extending the service life of the SFP socket.

VeEX's patent-pending Connector Protector system offers a simple, field-replaceable solution to safeguard sensitive optical test ports from contamination and physical damage, without sacrificing ...

QSFP dust covers are small plastic caps that are designed to protect the optical interface of a small form-factor pluggable (SFP) transceiver from dust, debris, and other contaminants. These dust ...

Protect your SFP fiber optic modules from unauthorized removal, tampering, and accidental disconnection with the SmartKeeper SFP Fiber Optic Module Lock Plus. This hardware-level security ...

Protect your SFP fiber optic modules from unauthorized removal, tampering, and ...

Custom and standard optical fiber delivers dimensional control and tight tolerances that are designed to withstand harsh-temperature, chemical and radiation environments.

Provide reliable protection for your optics with our 100-pack Dust Covers that ...
