

This transceiver is a high-performance module for short-range duplex data communication and interconnect applications. It integrates four electrical data lanes into transmission over a single LC ...

In order to work efficiently, BIDI optical modules must be paired, and the duplexer must be tuned to match the desired wavelengths of the transmitter and receiver to achieve bidirectional data ...

This module operates in the 1310nm/1490nm wavelength range, allowing for bi directional transmission over a single fiber, which is particularly useful for saving fiber resources.

The image of an optical module of the same type (10Gbps SFP+ BIDI Optical Module) is used for reference.

The 25G-SFP-D32-40 is a high-performance 25Gbps SFP28 BIDI transceiver, designed for reliable, long-range optical data transmission. It operates with a 1270nm/1310nm DFB laser, providing ...

The transmitting end of an optical module converts electrical signals into optical signals, while the receiving end converts optical signals back into electrical signals. Optical modules are classified by ...

Datasheet Huawei offers a comprehensive series of pluggable optical modules in the Huawei portfolio. The wide variety of modules gives you flexible and plug-and-play options for all types of interfaces. ...

The SFP-BIDI transceivers are high performance, cost effective modules supporting dual data-rate of 2.488Gbps/2.125Gbps and 20km transmission distance with SMF.

Upgrade your optical network with the Huawei 10G-BIDI-40KM-SFP+ -- the trusted long-reach SFP+ module for single-fiber 10G connectivity. Request a quote, datasheet, or sample today!

We perform compatibility tests for Huawei compatible BIDI 100G SR module with latest platforms of Huawei networking equipment, which allows us to encode transceiver EEPROM memory to be ...

This module operates in the 1310nm/1490nm wavelength range, allowing for bi directional transmission over a single fiber, which is particularly useful for saving ...

Optical Modules from Bidi Huawei
