

Polish Optical Protection Switches Low Loss

Integrated optical taps, optical power monitoring and low loss switching coupled with user friendly and powerful control interfaces provide the ideal solutions for cyber security and network monitoring ...

POLATIS 6000i Series switches up to 96x96 matrix size are designated "Ultra" owing to their ultra-high optical performance with <1.0 dB maximum insertion loss on sizes up to 32x32 and <1.2 dB ...

POLATIS combines the very best in optical performance with fast switching speeds and multiple software interfaces to provide a reliable solution for cross connect automation.

POLATIS low-loss characteristics ensure reliable and accurate test results and very fast switching speeds to ensure efficient and effective test processes. POLATIS offers superior optical performance ...

POLATIS all-optical switches enable new low-latency hybrid architectures that allow datacenters to scale to meet the demands of current and emerging virtual cloud services.

It is designed to meet the highest performance and reliability needs of the most demanding applications with exceptionally low optical loss, compact size, low power requirements and fast switching speeds.

By inserting POLATIS all-optical circuit switches with patented DirectLight(TM) technology into existing data center architectures, operators can simplify and speed the management and performance of the ...

Its exceptionally low optical loss, high connection repeatability and fast switching times make it ideal for optical test applications. There is no need repeatedly to make and break fiber optic connections so ...

POLATIS offers solutions that provide best-in-class performance at an attractive price and offers scalable, high-capacity, low-latency optical switching that allows government organizations to future ...

Single-mode network optical switch up to 384x384 ports -blocking all-optical matrix switch in the industry. Available in sizes up to 384x384, the Series 7000n all-optical circuit switch is designed to ...
