Satellite Light Module

Over 90,000 Satellite Components, Space components & Test equipment listed from more than 150 manufacturers. Search by specification and Get Quotes on parts that meet your specification.

It has been designed to be as small and light as possible with a multitude of uses. It"s compatible with Arduino, Windows, Mac and Linux computers (including Raspberry Pi), and many other platforms ...

Lockheed Martin"s small satellite solar arrays offer versatile solar power systems with up to 2,000W for any bus voltage.

This is the ST150 Dev Kit, providing the ST150M module on a development board with satellite and GPS patch antennas. Mounted on an Arduino Shield, it allows for the development and testing of ...

Incredibly compact and lightweight, the Iridium Core 9523 embedded module drives innovation and helps meet the needs of under served markets around the globe. Iridium is forging ahead with its ...

On this page we"ll explain the basics of satellite solar panels, how to find the perfect power match for your satellite, which questions to address when dimensioning your satellite solar panels and the ...

The Iridium Satellite LLC 9603N is an IoT Module that supports two-way satellite communication connectivity. The Iridium 9603 delivers Iridium Short Burst Data in an extremely small ...

It has been designed to be as small and light as possible with a ...

The Iridium Satellite Module from Kintech Engineering includes the Iridium Core 9523N modem module and is designed by Kintech Engineering to meet the regulatory requirements for approval for FCC, ...

The Iridium 9603 Module is the smallest commercially available satellite module, offering a lightweight and low-power solution for flexible integration into various systems.

Anyone needing clean, controllable, safe light can benefit. Applications range from extending solar generation hours without requiring any new land or ground infrastructure to illuminating precise areas ...
