

# Selection of Dedicated OTDR Testing Module for Metropolitan Area Networks

The Nettek OTDR platform offers a full suite of optical testing modules for a complete solution for Metro Networks, FTTx (PON) Networks and Enterprise Networks.

OTDR test solution for use in installing, turning up, and maintaining long-haul, metro, FTTx/PON, access, and enterprise networks.

Modular in design, the T-BERD/MTS-6000A offers an extensive portfolio of test functionality for multiple network layers. A single Multi-Services Application module provides an integrated solution for ...

High-resolution OTDR designed for metro network testing and splitter characterization in PON FTTx applications. Optimized for use during the rollout and troubleshooting of metro/core and FTTx/MDU ...

Learn how to select the right OTDR: wavelengths, dynamic range, blind zones, pulse width. Recommendations for FTTH, data centers, backbone networks to boost fiber testing efficiency.

This measuring module is ideally suited for the installation, setup, and maintenance of FTTx/PON access, metro, and enterprise networks - at given wavelengths, this module locates errors reliably in ...

This makes it much easier to understand OTDR traces, allowing technicians of any skill level to get accurate results on their first try. The applications of the EXFO FTBx-730C include, but are not ...
