

Service life of pigtails in computer rooms

Service life varies by material, exposure, installation quality, and use. A protected Grounding Pigtail in a dry, stable location may last for many years, while the same part exposed to ...

The majority of receptacles you'll see out in the wild are wired without pigtails. It's faster and the builders and contractors can't justify several extra hundreds of dollars (mostly labor, of course) just to do pigtails.

Without pigtails you would use the receptacle screws instead of wire nuts to connect everything. 6 wires makes it a lot harder to push the device in. With stranded this does not matter as ...
