

Single-mode fiber 20 meters per head

Product Description This 20 meter (~65 feet) fiber optic cable is terminated with a LC (Lucent Connector) connector on one end and a ST (Straight Tip/Bayonet Connector) connector on the other end. It is a ...

These 20 m length OS2 cables have a yellow 9/125 micron single mode jacket, LC to SC male connectors on each end and ceramic ferrules to ensure optimal data transfer.

Featuring various wavelength ranges spanning the VIS and IR spectra, these fiber spools cover a wide range of applications that require specific wavelengths and provide tight cutoff tolerances.

Single-mode fiber optic cable (SMF) is a type of optical fiber designed to carry a single ray of light mode directly down the fiber core.

This singlemode fiber cable adopts fiber America Kevlar Aramid Yarn, higher ...

Thorlabs" SM1950 fiber enables single mode transmission from 1850 - 2200 nm. This fiber features a Ge-doped silica core surrounded by a pure silica cladding and a UV-cured acrylate coating.

This single-mode full spectrum optical fiber with reduced diameter ideal for high density applications utilized in optical fiber cable shall meet ITU-T Recommendation (G.652.D attributes; G.657.A2 ...

Manufactured using OptoSpan Premium OS2 fiber, standard jacket Plenum Fiber Cable is designed for light to medium duty indoor applications such as data-center racks and desktop/network connections.

This singlemode fiber cable adopts fiber America Kevlar Aramid Yarn, higher tensile strength. 9/125um fiber core and 2.0mm cable diameter provide maximum protection.

Belden fiber products are third-party tested by either ETL or UL and approved for use according to the National Electric Code. Offered dry or gel-filled in plenum, riser with outside plant (OSP) and ...

We have a range of accessories designed to work with our products. Check them out! More Q& As may be available on the N36820M model support page.
